**About the Conference**

This International Conference focus on geotechnical aspects in the disposal of waste materials and the remediation of environmentally contaminated sites. Disposal of waste generated by people and industrial processes is an important issue in our society. If this waste is not managed in a safe and reliable manner, then human health and the environment are at risk. Waste containment facilities like landfills are one of the most commonly used means for waste disposal. The main objective of this International Conference is creating forum to researchers, academicians, practicing professionals share their ideas in Environmental Geotechnics.
