VI-F, DPS Kalyanpur**

**WE MUST PLANT MORE TREES TO PREVENT :-**

**DEFORESTATION**

**SOIL EROSION**

**DROUGHT**

# DEFORESTATION

*Cutting down or felling large number of trees is termed as deforestation. Deforestation is the major cause of soil erosion as when trees are cut down, the soil is easily taken away by the wind.*

# DEFORESTATION IS CAUSED DUE TO :-

*Cutting down trees*

*Forest fire*

# SOIL EROSION

*Soil erosion is a one form of soil degradation. It is caused when the soil is taken away by the action of wind, water and human activities.*

# SOIL EROSION IS CAUSED BY:-

**WIND**

**WATER**

# DROUGHT

When there is no rain over a long period of time, it is said that a drought has occurred. A drought lasts for months or years, or may be professed after 15 days.

# SOME ENVIRONMENT FESTIVALS
